

## “TODAY...TOMORROW...TECHNOLOGY”

- Single-phase & 3-phase UPS Systems
- Power distribution units & surge protection
- (ePDU) Enclosure power distribution units
- Network rack & enclosures
- Overhead cable management and accessories
- Predict Pulse Predictive remote monitoring for infrastructure management
- Service Contracts and battery replacements

- Custom and built-to-order racks and enclosures
- Data center airflow management solutions
- Modular office and laboratory furniture

- UST specializes in demand-side voltage control Battery and UPS Monitoring
- Full range of industrial-grade power conditioners and voltage regulators capable of mitigating sags and surges within one cycle
- Deployed worldwide at major industrial, commercial and governmental facilities

- Refrigerant-based cooling (R-134a or R- 450A)
- Non-toxic, non-conductive, non-corrosive
- “Active” Heat Extraction supports up to 30kW per rack
- 20 kW N+1 redundancy per rack
- Eliminates the need for raised floor for cooling

- Serving UPS, telecom, and energy & infrastructure markets
- Turn-Key UPS Installation
- UPS Preventative and corrective maintenance services
- Battery preventative and corrective maintenance services
- Offered Nationwide-**

- This particular SPD utilizes a patented technology, silicon-carbide, which make varistors incredibly stable
- Clean-Volt eliminates electrical irregularities and optimizes the operation of sensitive equipment such as; Computers, Servers, Led Lighting, VFD's, Motors & Home Automation Systems
- Fastest connected response time, Fail-Safe not requiring a current limiting fuse, Perfect for Residential, Commercial, Industrial & Agricultural
